Executive Summary

Motivated and detail-oriented Computer Science student with strong analytical, problem-solving, and data analysis skills. Experienced in working on real-world projects involving data handling, application development, and system design. Demonstrates strong ownership, proactive mindset, and ability to quickly adapt to new concepts and technologies. Skilled in cross-functional collaboration, effective communication, and understanding project requirements to deliver efficient solutions. Passionate about continuous learning, process improvement, and contributing to high-impact, scalable systems.

Education

VIT Bhopal University

BTech - Computer Science and Engineering

Cumulative GPA:9.05/10

Bhopal, Madhya Pradesh

Expected June 2026

Skills

Programming Languages: Java, Python.

Tools and Technologies: VS Code, GitHub, Pandas, NumPy, Matplotlib, Microsoft Excel, SQL, Project Management.

CS Fundamentals: Data Structures and Algorithms, OOPs in java, Operating System, DBMS.

Soft Skill: Communication, Problem Solving, Ownership, Team Collaboration, Adaptability

Extracurricular

- Participated in ZS Associates Hackathon, collaborating on problem-solving skill in a fast-paced team environment.
- Engaged in SolVIT Hackathon, contributing to innovative solutions and honing technical and teamwork skills.
- Involved in team-based academic projects, improving coordination, communication, and project execution skills.
- Participated in industrial visits (BHEL, BSNL, T-Works, CMSD), gaining exposure to real-world business operations and organizational workflows.
- Engaged in problem-solving and case-based thinking through academic and extracurricular activities.

Achievements

- Awarded the Dreamed STARS Scholarship from VIT Bhopal (100% fee concession).
- Awarded the INSPIRE Scholarship for being among the top 1% of students.
- Secured first position in district merit in class 12th.
- Successfully completed a 100 Days of Code Challenge, demonstrating discipline, consistency, and commitment.
- Recognized for strong academic performance and consistent results throughout engineering.

Projects

Student Performance Analytics System

27 Jan 2025- 14 April 2025

- Description: Developed an interactive student performance analytics system to analyze academic data of 1000 students from a CSV file, computing key statistical parameters such as mean, median, variance, standard deviation, pass/fail status, and topper identification, with an interactive dashboard for subject-wise and student-wise insights.
- Demonstrated ownership by handling end-to-end development, testing, and validation
- Improved problem-solving and debugging skills through iterative development
- Technology: Python, Pandas, NumPy, Streamlit, Matplotlib, CSV File Handling.
- Role: Data analysis, statistical computation, CSV data processing, UI dashboard development, and data visualization.

Contact Management System(Python GUI Application)

Dec 2025 – Jan 2026

- Description: This project is built using Python and Tkinter. Tkinter is used to create a graphical user interface, and SQLite is used to store contact data. The application helps users manage contact details digitally by allowing them to add, view, update, and delete contacts easily.
- Technology: Python, Tkinter, SQLite.
- Role: GUI development, database integration, CRUD operations, input validation, and application testing.

Certifications

- Programming in Java Certification – Infosys Springboard
- Programming in Python Certification – Infosys Springboard

Additional Information

Languages: English, Hindi

Hobbies: Communication & Social, Reading Books, Runner-up , Badminton, Carrom.
